Velammal College of Engineering and Technology Department of Computer Science and Engineering

CSE CHRONICLES

Learn Today ... Lead Tomorrow...

MISSION

- Heightening the knowledge of the faculty in recent trends through continuous development programmes.
- Transforming the students into globally competent and technically well-equipped computer Professionals with strong theoretical and practical knowledge.
- Cultivating the spirit of social and ethical values for the cause of development of our Nation.

VOLUME 4
ISSUE 2

NOV 2021-FEB 2022

CHIEF ADVISOR:

DR.P.Alli,M.S.,Ph.D.,
DEAN-PLANNING AND DEVELOPMENT,
Professor & Head, Department of CSE

Welcome to the department of Computer science and Engineering "The function of education is to teach one to think intensively and think critically. Intelligence plus character - that is the goal of true education."-Martin Luther King, Jr.

The Department of Computer science and Engineering is a center of excellence for computer science teaching and research. It was established in 2007 and it started with 60 students and 4 faculty members. Now it has grown to 477 students and 26 faculty members. The department offers both Under Graduate and Post Graduate courses in CSE. The department has a well-equipped computer lab with centralized monitoring facility and it is an approved Research Centre of Anna University, Chennai. The Department has signed MoUs with CISCO, TYCO Electronics, and Pearson VUE authorized testing center and has received funds from DST, DRDO, MNRE, ISRO, and IEI worthy of Rs.111.96 Lakhs for R&D work.

The Department with qualified, experienced, and dedicated faculty strength of Professors and Assistant Professors sufficiently caters to its requisite teaching and research requirements. Its curriculum covers all areas of Computer Science and Engineering in the streams such as Hardware and System Programming, Application Development, Networking, and Distributed computing, Data Engineering and Data Analytics and Software Engineering."

Elon Musk

ELON MUSK WAS BORN JUNE 28, 1971, IN
SOUTH AFRICA, SOUTH AFRICAN-BORN AMERICAN
ENTREPRENEUR WHO COFOUNDED THE ALL OF
ELECTRONIC-PAYMENT FIRM PAYPAL AND FORMED
SPACEX, MAKER OF LAUNCH VEHICLES AND
SPACECRAFT. HE WAS ALSO ONE OF THE FIRST
SIGNIFICANT INVESTORS IN, AS WELL AS CHIEF
EXECUTIVE OFFICER OF, THE ELECTRIC CAR
MANUFACTURER TESLA.

MUSK WAS BORN TO A SOUTH AFRICAN FATHER AND A
CANADIAN MOTHER. HE DISPLAYED AN EARLY TALENT FOR
COMPUTERS AND ENTREPRENEURSHIP. AT AGE 12 HE CREATED A
VIDEO GAME AND SOLD IT TO A COMPUTER MAGAZINE. IN 1988, AFTER
OBTAINING A CANADIAN PASSPORT, MUSK LEFT SOUTH AFRICA BECAUSE HE
WAS UNWILLING TO SUPPORT APARTHEID THROUGH COMPULSORY MILITARY
SERVICE AND BECAUSE HE SOUGHT THE GREATER ECONOMIC OPPORTUNITIES AVAILABLE IN THE
UNITED STATES.

MUSK ATTENDED QUEEN'S UNIVERSITY IN KINGSTON, ONTARIO, AND IN 1992 HE TRANSFERRED TO THE UNIVERSITY OF PENNSYLVANIA, PHILADELPHIA, WHERE HE RECEIVED BACHELOR'S DEGREES IN PHYSICS AND ECONOMICS IN 1997, HE ENROLLED IN GRADUATE SCHOOL IN PHYSICS AT STANFORD UNIVERSITY IN CALIFORNIA, BUT HE LEFT AFTER ONLY TWO DAYS BECAUSE HE FELT THAT THE INTERNET HAD MUCH MORE POTENTIAL TO CHANGE SOCIETY THAN WORK IN PHYSICS. IN 1995 HE FOUNDED ZIP2, A COMPANY THAT PROVIDED MAPS AND BUSINESS DIRECTORIES TO ONLINE NEWSPAPERS. IN 1999 ZIP2 WAS BOUGHT BY THE COMPUTER MANUFACTURER COMPAQ FOR \$307 MILLION, AND MUSK THEN FOUNDED AN ONLINE FINANCIAL SERVICES COMPANY, X.COM, WHICH LATER BECAME PAYPAL, WHICH SPECIALIZED IN TRANSFERRING MONEY ONLINE. THE ONLINE AUCTION EBAY BOUGHT PAYPAL IN 2002 FOR \$1.5 BILLION. ITS FIRST TWO ROCKETS WERE THE FALCON 1 (FIRST LAUNCHED IN 2006) AND THE LARGER FALCON 9 (FIRST LAUNCHED IN 2010), WHICH WERE DESIGNED TO COST MUCH LESS THAN COMPETING ROCKETS. A THIRD ROCKET, THE FALCON HEAVY (FIRST LAUNCHED IN 2018), WAS DESIGNED TO CARRY 117,000 POUNDS (53,000 KG) TO ORBIT, NEARLY TWICE AS MUCH AS ITS LARGEST COMPETITOR, THE BOEING COMPANY'S DELTA IV HEAVY, FOR ONE-THIRD THE COST. SPACEX HAS ANNOUNCED THE SUCCESSOR TO THE FALCON 9 AND THE FALCON HEAVY: THE SUPER HEAVY-STARSHIP SYSTEM. THE SUPER HEAVY FIRST STAGE WOULD BE CAPABLE OF LIFTING 100,000 KG (220,000 POUNDS) TO LOW EARTH ORBIT. THE PAYLOAD WOULD BE THE STARSHIP, A SPACECRAFT DESIGNED FOR PROVIDING FAST TRANSPORTATION BETWEEN CITIES ON EARTH AND BUILDING BASES ON THE MOON AND MARS. SPACEX ALSO DEVELOPED THE DRAGON SPACECRAFT, WHICH CARRIES SUPPLIES TO THE INTERNATIONAL SPACE STATION (ISS). DRAGON CAN CARRY AS MANY AS SEVEN ASTRONAUTS, AND IT HAD A CREWED FLIGHT CARRYING ASTRONAUTS DOUG HURLEY AND ROBERT BEHNKEN TO THE ISS IN 2020. MUSK SOUGHT TO REDUCE THE EXPENSE OF SPACEFLIGHT BY DEVELOPING A FULLY REUSABLE ROCKET THAT COULD LIFT OFF AND RETURN TO THE PAD IT LAUNCHED FROM. BEGINNING IN 2012, SPACEX'S GRASSHOPPER ROCKET MADE SEVERAL SHORT FLIGHTS TO TEST SUCH TECHNOLOGY.

IN ADDITION TO BEING CEO OF SPACEX, MUSK WAS ALSO CHIEF DESIGNER IN BUILDING THE FALCON ROCKETS, DRAGON, AND GRASSHOPPERMUSK HAD LONG BEEN INTERESTED IN THE POSSIBILITIES OF ELECTRIC CARS, AND IN 2004 HE BECAME ONE OF THE MAJOR FUNDERS OF TESLA MOTORS (LATER RENAMED TESLA), AN ELECTRIC CAR COMPANY FOUNDED BY ENTREPRENEURS MARTIN EBERHARD AND MARC TARPENNING. IN 2006

INTRODUCED ITS FIRST CAR, THE ROADSTER, WHICH COULD

TRAVEL 245 MILES (394 KM) ON A SINGLE CHARGE.

UNLIKE MOST PREVIOUS ELECTRIC VEHICLES, WHICH MUSK THOUGHT WERE STODGY AND UNINTERESTING,

T WAS A SPORTS CAR THAT COULD GO FROM 0

TO 60 MILES (97 KM) PER HOUR IN LESS THAN

FOUR SECONDS. IN 2010 THE COMPANY'S

INITIAL PUBLIC OFFERING RAISED ABOUT

\$226 MILLION. TWO YEARS LATER TESLA

INTRODUCED THE MODEL IN THE CIT

SEDAN, WHICH WAS ACCLAIMED BY

AUTOMOTIVE CRITICS FOR ITS

PERFORMANCE AND DESIGN. THE C

OMPANY WON THEFURTHER PRAISE

FOR ITS MODEL X THE MOST

LUXURY SUV, WHICH WENT ON THE

MARKET IN 2015. THE MODEL 3, A

LESS-EXPENSIVE VEHICLE, WENT I

NTO PRODUCTION IN 2017.ELON MUSK EXPRESSED RESERVATIONS

ABOUT TESLA BEING PUBLICLY TRADED.

AND IN AUGUST 2018 HE MADE A SERIES OF TWEETS ABOUT TAKING THE COMPANY PRIVATE, NOTING THAT HE HAD "SECURED FUNDING. THE FOLLOWING MONTH THE U.S. SECURITIES AND EXCHANGE COMMISSION (SEC) SUED MUSK FOR SECURITIES FRAUD, ALLEGING THAT THE TWEETS WERE "FALSE AND MISLEADING." SHORTLY THEREAFTER TESLA'S BOARD REJECTED THE SEC'S PROPOSED SETTLEMENT, REPORTEDLY BECAUSE MUSK HAD THREATENED TO RESIGN. HOWEVER, THE NEWS SENT TESLA STOCK PLUMMETING, AND A HARSHER DEAL WAS ULTIMATELY ACCEPTED. ITS TERMS INCLUDED MUSK STEPPING DOWN AS CHAIRMAN FOR THREE YEARS, THOUGH HE WAS ALLOWED TO CONTINUE AS CEO.

DISSATISFIED WITH THE PROJECTED COST (\$68 BILLION) OF A HIGH-SPEED RAIL SYSTEM IN CALIFORNIA, MUSK IN 2013 PROPOSED AN ALTERNATE FASTER SYSTEM, THE HYPERLOOP, A PNEUMATIC TUBE IN WHICH A POD CARRYING 28 PASSENGERS WOULD TRAVEL THE 350 MILES (560 KM) BETWEEN LOS ANGELES AND SAN FRANCISCO IN 35 MINUTES AT A TOP SPEED OF 760 MILES (1,220 KM) PER HOUR, NEARLY THE SPEED OF SOUND. MUSK CLAIMED THAT THE HYPERLOOP WOULD COST ONLY \$6 BILLION AND THAT, WITH THE PODS DEPARTING EVERY TWO MINUTES ON AVERAGE, THE SYSTEM COULD ACCOMMODATE THE SIX MILLION PEOPLE WHO TRAVEL THAT ROUTE EVERY YEAR. HOWEVER, HE STATED THAT, BETWEEN RUNNING SPACEX AND TESLA, HE COULD NOT DEVOTE TIME TO THE HYPERLOOP'S DEVELOPMENT.

CODE RED FOR HUMANITY

From the devastating wildfire season in California to the eruption of the la Palma volcano in Spain,the climate change impacts were felt in every corner of the world in 2021. The United Nations climate panel warns that a hotter future is about to come that will lead to increased summers and decreased winters.

The amount of CO2 in the atmosphere is hitting so fast that the effect of lockdowns on the concentrations of CO2 in the atmo-

sphere was so small that it registers as a "blip" that is hard -ly distinguishable from the

-ly distinguishable from the year-to-year fluctuations of the carbon cycle. but Despite all the agree -ments to step up, the world is still on track to heat up to danger -ous levels. 2020 has brought a disastrous climate change that in Europe, it has recorded the hottest year ever and that in Siberia, the sea ice melts in large amounts as it reported the hottest temp

-erature in the Arctic.

Shockingly, researchers say that the global temperature will increase by about 1.5 degrees in celsius in the next decades. Here are some important steps that Govern-ment should take utmost care of: A drastic reduction in fossil fuel and the natural gas usage, increase in the growth of low carbon energy sources like solar, wind, hydro, nuclear and biomass,

I don't want you to be hopeful. I want you to panic. I want you to feel the fear I feel everyday. I want you to act. I want you to act like you would in a crisis. I want you to act like your house is on fire, because it is."

- Greta Thunberg

decreased consumption of meat, eggs, seafood and dairy products, expansion of forests and agricultural fields, electrification of passenger vehicles, reducing emissions of industrial processes, decrease in the energy consumption of home appliances.

Although it is troublesome for Governments over the world to enforce these actions, a small initiative must be taken from our side to reduce global warming. Try putting non-

> degradable wastes in the dustbin, planting and watering more trees, participating in Go-

> > Green activities, walking in the short distances instead of riding the fueled vehicles, ,limiting the use of plastics.

Stopping climate change is not easy.
But if we work together, our micro efforts will have a macro effect on our environment.
As a young generation,

let us help the future generation in shaping our environment. Our voice matters and our life matters. Let not Greta

Thunberg's efforts be failed!

-ஹரி M.

CHAIRMAN'S MESSAGE

"Every young Indian of this great country should dream big". It is not enough if they only dream but they should work hard to make it real. We, at Velammal College of Engineering and Technology, Madurai, provide the necessary platform to many aspiring youths of this region to become very enterprising Engineers, so that they could provide the right kind of engineering solutions to propel our nation to greater heights. We sincerely believe in imparting quality engineering education laced with deep social values to ensure that every individual who is graduated from our Institution not only becomes Engineer but a also competent a very responsible citizen.

It is high time that we should get away from the age old practice of "standardised testing" to "creative learning". It has been our earnest endeavour to produce such Engineers who could offer very creative solutions. Life will not provide any warranties and guarantees; it provides only possibilities and opportunities. We want all our budding Engineers to remember this and make the best use of their college life. We are on an incredible journey and we expect every Velammalian to "do the right thing, at the right time, in the right way and for the right reason." Come on young vibrants! Join in our exhilarating journey towards growth and success!

> SHRI. M. V. MUTHURAMALINGAM, CHAIRMAN

EVERY PINT OF BLOOD CAN SAVE UP TO THREE LIFES. AND ALL IT TAKES FOR US TO GENERATED BACK THE LOST BLOOD IS FEW DAYS. BLOOD IS THE RED LIFE SOURCES RUNNING THOUGH OUR VEINS. IT KEEP US ALIVE, AND A LITTLE BIT OF IT CAN SAVE MANY LIFE.

SO DONATE BLOOD

My first Experience...

I donated my blood at my age of 17 in a blood camp held near Teppakulam for the first time. My senior friend approached me whether i could donate blood or not? and suddenly I said yes as I loved involving me in any such of these service activities. First of all they advised me to eat heavy breakfast. As I went there, I was asked to take up several health checkups like my height, weight and which blood group I belong to? After all those check ups, I went inside the mobile medical van. I was little bit scared when I saw the injection, but after that process I didn't feel any pain and I felt comfortable. I felt really proud that I had saved a person's life by giving blood. And this became a habit of mine of giving blood whenever required.

RULES FOR DONATING BLOOD

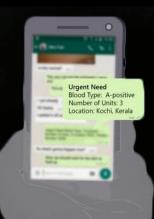

There are some rules and conditions for donating blood:

- The donor must be greater than the age of 18
- Weight must be minimum 50kgs.
- The donor must have food before 2 hours of donation.
- Donor must be physically fit .
- Age requirement, time interval of food consumption is compulsory.
- We must strictly abide by these rules at the time of blood donation.

All the citizens are hereby request to donate blood to the organization, for saving a life. And we hope that service to save a life in this manner keeps going after every 6 months.

Blood Donors Are Life Savers

Our honourable institution has taken various initiatives to increase the well being of unknown. Out of all we think that this is most outstanding because ,it included students to participate to save lives. At the same time, it will also bring awareness to them.

VCET BLOOD DONORS GROUP

We really appreciate the efforts taken by the blood donor club chief and members.

We assure you that we the cse department will always give our atmost support.

A drop of blood can save a life! Don't waste it and donate blood.

3 IDIOTS

An Innovative competition "3 IDIOTS" was conducted by the ISTE in November, with the motive of not just developing an idea but also implementing and selling them. The basic rules were, A team of three members of different departments can participate under mentor guidance. Each project should contain the details and the scope of the project's relevance to society. Many students have participated and the final day arrived. Everyone in the college was excited to know who were all the winning teams and whose project is going to be sold to the college which is a big privilege for any aspiring student and they revealed it is none other than Asmitha B.G and Deepthitha. K.S of fourth year has secured Second Prize for the project "VIRTUAL QUEUEING SYSTEM FOR PUBLIC DISTRIBUTION SYSTEM" under the guidance of Dr.R.Deepalakshmi M.E., Ph.D., Professor.

"VIRTUAL QUEUEING SYSTEM FOR PUBLIC DISTRIBUTION SYSTEM"

Team Members:

Asmitha B G
Deebthitha K S
IV-Year
Computer Science and Engineering

Guide:

Dr.R.Deepalakshmi M.E., Ph.D., Professor,

Their project is about ...

In today's busy world, time and efforts had become most valuable thing for people, In the existing Public Distribution System, works which include product distribution, ration card entry, product weighing, and product delivery are done manually by the peoples of PDS (Public Distribution System) and this makes people to wait in long queues for long time which are becoming a major real-world problem. Additionally, Covid19 has also become a main reason for people to avoid queues. At times there are chances of unavailability of stock and people are asked to come again to get delivered. This module allows Consumers to register their details and attach photo of ration card and then can login with their registered ration id and password, place order in order page and collect date and time of collection, token number and OTP, also PDS Shop peoples can also view stock and allot date and time of collection.

This application can be used in a Public distribution system to reduce processing work load. This project's main idea is to develop an online centralized application connected to database which will maintain stock and ration holder details. This Virtual queueing system for public distribution system will reduce paperwork and maintain record in a more efficient & systematic way. This module will also reduce long queues as it allots date and time as per token numbers, making it efficient and improve the current system of PDS with virtual queuing system.

NOVA EXAMS

Srekaravarshan.N.K of II-Year Cse-b has secured Third place for his project NOVA EXAMS under the guidance of Mrs. Grace Shalini M.E.,M.B.A, Assistant Professor. Their project is all about creating an application for school students to attend the exam on various platforms such as IOS, Android, and Web applications. The main purpose is to streamline the process of sharing files between teachers and students.

Teachers can post the study materials and also conduct exams. Using the materials students can prepare and attend their exams. After the end of the test, the form will be submitted and evaluated. The question and answer can be text or pictures or audio or videos. After the completion of Exams, Student's performance statistical analysis can be done by the teacher.
