Details of special programmes for slow learners and student participation details and outcome records

For the slow performers:

1. They undergo one on one counselling with their concerned tutorial staff (the whole class of 150 students were divided into 6-7 tutorial groups) to identify their learning problem.
2. The tutorial teacher will find out whether the student.
 - a. Lacks initiative (due to personal/social issues)
 - b. Has problems with accommodating to new environment (college, hostel, friends) has language problems
 - c. Has difficulty in communication?
 - d. Was not able to follow the lecture class.
 - e. Finds the subject too volatile & uninteresting.
 - f. Cannot understand the facts and concepts.
 - g. Goes not know to give weightage to important points but memorizes everything.
 - h. Does not know to present test paper properly in an organized way (though able to understand well)
 - i. Not able to complete the test on time etc.
3. For the students who lack initiative/ having adjustment problems personal counselling was given by the tutorial staff and necessary steps taken either by communicating with his/her parents, friends or the warden. If required, psychologist's opinion is also sought.
4. All the students were instructed to meet the concerned tutorial teacher after the class hours in the evening at least twice a week.
5. For the students who have language/ communication problems, the tutorial teacher suggests measures to improve their language especially for students who are from medium other than English. For eg, right way of using dictionaries, telling the meaning of specific medical terms in the suggested text books by reading the paragraph aloud with explanation. For the slow learners who were residing in the hostel, a group of students from the same or senior batch (who are good in language, communication skills and

interested in teaching, guiding) were appointed and each one will take care of a single slow learner personally.

6. Evening classes are then conducted for the slow performers by the department staff every Tuesday and Thursday between 4.15 to 5.15 pm. The topics were informed a week ahead and the students were supposed to read the topic at least once before attending the evening class.

The concerned teacher discusses the subject content with the head of the department before going to the class. It was ensured by the head of the department that in the evening class the students were taught the facts and concepts in an interesting way, in simple language within stipulated time, highlighting the important points & emphasizing its clinical relevance. It was a sort of group discussion and not a routine lecture. The students were instructed to keep their text books open in the class and note down the salient points.

Each student was given individual attention by either asking questions in between/by asking them to come and draw the relevant pictures in the white board/by asking them to write flow chart in the board/or by asking them to teach the same topic to the other students. They were encouraged to ask more questions. The students were also taught how that particular topic should be presented in the paper on time colorfully & legibly. At the end of the class, a 5-minute test will be conducted and the papers will be corrected immediately and the feedback given.

7. The students were also given assignments on important topics and this has to be corrected and discussed by the concerned tutorial staff.
8. It is mandatory that the slow performers should present student seminars so as to arouse their interest in understanding and presenting the subject content.
9. They were also encouraged to participate in role play activities on clinical topics to enhance their communication skills with the patient, develop empathy and interest in the learning the subject.
10. If the students show improvement in the subsequent IA exam, then they will be stopped from the evening classes but their progress will be continuously monitored and will always be under the guidance of their tutorial teachers.

Dept. Name Physiology

Circular

Date: 16/10/2017

Dear Students/staff members,

This is informed that a Remedial class will be conducted for 1 year M.B.B.S. (2017-2018) batch students on every Tuesday and Thursday from 17-10-2017 to 02-11-2017.

Faculty incharge: Dr.S.Anu, Prof and HOD, Dept of Physiology.

Timings:04.00 to 05.00 PM

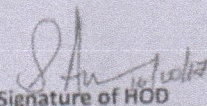

Venue:Demo hall, Dept of Physiology

Topic:Cardiovascular system

Duration:One hour every Tuesday and Thursday

Outcome: The slow learning students attended remedial classes every Tuesdays and Thursdays and wrote separate short tests every week. Attendance was made compulsory. After one month of attending remedial classes 63.2% of students (31 students) had attained more than 10% improvement in the following internal assessment exam. 46.9% of students (23 students) had shown more than 20% improvement in that following internal assessment exam.

VELAMMAL MEDICAL COLLEGE HOSPITAL AND RESEARCH INSTITUTE MADURAI - 625009

Special programmes for advanced learners

1. More concentration was given to these students during the tutorial hours by the concerned tutorial staff. Tips were given by the concerned tutorial staff regarding
 - a. The importance of reading other standard physiological textbooks apart from the suggested ones
 - b. Solving problem-based questions
 - c. Improving their paper presentation skills
 - d. Use of e-sources for updating their knowledge
 - e. Clinical significance of the particular topic
2. They were encouraged to prepare MCQ's from a particular topic so as to improve the depth in the subject
3. Training was given to these students to participate in state level quiz competitions by coordinating with other clinical departments. They were sent to medicine, surgery, radiology, nephrology, gastroenterology, pathology, pharmacology etc. to be taught by experienced professors.
4. They were also encouraged to present papers in conferences.
5. Special prizes were awarded as token of appreciation in the second year if they get honors or distinctions in the first-year university examination.

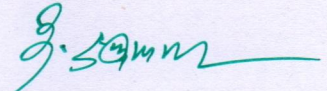

Outcome record- Protocols followed to measure achievements

1. Based on the III Internal assessment exam performance
2. Based on the Final IA exam performance
3. Compiled theory & practical marks including viva at the end of the year before university exams.
4. Medal exams were conducted for assessing both theory and practical skills.

Details of special programmes for slow learners:

1. They undergo one on one counselling with their concerned tutorial staff (the whole class of 150 students were divided into 6-7 tutorial groups) to identify their learning problem.
2. The tutorial teacher finds out whether the student.
 - a. Lacks initiative (due to personal/social issues)
 - b. Has problems with accommodating to new environment (college, hostel, friends)
 - c. Has language problems?
 - d. Has difficulty in communication was not able to follow the lecture class?
 - e. Finds the subject too volatile & uninteresting.
 - f. Cannot understand the facts and concepts.
 - g. Does not know to give weightage to important points but memorizes everything.
 - h. Does not know to present test paper properly in an organized way (though able to understand well)
 - i. Not able to complete the test on time etc.

**VELAMMAL MEDICAL COLLEGE
HOSPITAL AND RESEARCH INSTITUTE
MADURAI - 625009**

3. For the students who lack initiative/ having adjustment problems personal counselling was given by the tutorial staff and necessary steps taken either by communicating with his/her parents, friends or the warden. If required, psychologist's opinion is also sought.
4. All the students were instructed to meet the concerned tutorial teacher after the class hour in the evening at least thrice a week.
5. For the students who have language/ communication problems, the tutorial teacher suggest measures to improve their language especially for students who are from medium other than English. For eg, right way of using dictionaries, telling the meaning of specific medical terms in the suggested text books by reading the paragraph aloud with explanation. For the slow learners who are residing in the hostel, a group of students from the same or senior batch (who are good in language, communication skills and interested in teaching, guiding) were appointed and each one will take care of a single slow learner personally.
6. Evening classes are then conducted for the slow performers by the department staff every Tuesday and Thursday between 4.15 to 5.15 pm. The topics were informed a week ahead and the students were supposed to read the topic at least once before attending the evening class.

The concerned teacher discusses the subject content with the head of the department before going to the class. It was ensured by the head of the department that in the evening class the students were taught the facts and concepts in an interesting way, in simple language within stipulated time, highlighting the important points & emphasizing its clinical relevance. It was a sort of group discussion and not a routine lecture. The students were instructed to keep their text books open in the class and note down the salient points. Each student was given individual attention by either asking questions in between/by asking them to come and draw the relevant pictures in the white board/by asking them to write flow chart in the board/or by asking them to teach the same topic to the other students. They were encouraged to ask more questions. The students were also taught how that particular topic should be presented in the paper on time colorfully & legibly.

VELAMMAL MEDICAL COLLEGE
HOSPITAL AND RESEARCH INSTITUTE
MADURAI - 625009

At the end of the class, a 5-minute test will be conducted and the papers will be corrected immediately and the feedback given.

7. The students were also given assignments on important topics and this has to be corrected and discussed by the concerned tutorial staff.
8. The slow performers were also encouraged to present student seminars. It is mandatory that all students are given equal chances.
9. They were also encouraged to participate in role play activities on clinical topics to create interest in the subject.
10. If the students show improvement in the subsequent II class test or IA, then they will be stopped from the evening classes but their progress will be continuously monitored and will always be under the guidance of their tutorial teachers

Circular

Date: 08/10/2018

Dear Students/staff members,

This is informed that a Remedial class will be conducted for 1 year M.B.B.S. (2018-2019) batch students on every Tuesday and Thursday from 09.10.2018 to 01.11.2018.

Faculty incharge: Dr.S.Anu, Prof and HOD, Dept of Physiology.

Timings:04.00 to 05.00 PM

Venue:Demo hall, Dept of Physiology

Topic:Cardiovascular system

Duration:One hour every Tuesday and Thursday

Special programmes for advanced learners:

1. More concentration is given to these students during the tutorial hours by the concerned tutorial staff. Tips were given by the concerned tutorial staff regarding
 - a. The importance of reading other standard physiological text books apart from the suggested ones
 - b. Problem based questions were given to solve and discuss
 - c. Improving their paper presentation skills
 - d. Use of e-sources for updating their knowledge
 - e. Analysis of clinical cases
2. They were encouraged to prepare MCQ's from a particular topic so as to improve the depth in the subject
3. Training was given to these students to participate in state level quiz competitions by coordinating with other clinical departments. They were sent to medicine, surgery, radiology, nephrology, gastroenterology, pathology, pharmacology etc to be taught by experienced professors.
4. They were also encouraged to present papers in conferences.
5. Special prizes were awarded as token of appreciation in the second year if they get honors or distinctions in the first-year university examination.

Details of Special Programmes for Slow Learners And Student Participation Details And Outcome Records

For the slow performers:

1. They undergo one on one counselling with their concerned tutorial staff (the whole class of 150 students were divided into 6-7 tutorial groups) to identify their learning problem.
2. The tutorial teacher will find out whether the student Lacks initiative (due to personal/social issues) b. has problems with accommodating to new environment (college, hostel, friends) c. has language problems c. has difficulty in communication d. was not able to follow the lecture class e. finds the subject too volatile & uninteresting f. cannot understand the facts and concepts g. does not know to give weightage to important points but memorizes everything h. does not know to present test paper properly in an organized way (though able to understand well) h. not able to complete the test on time etc
3. All the students were instructed to meet the concerned tutorial teacher after the class hour in the evening at least thrice a week.
4. For the students who have language/ communication problems, the tutorial teacher suggests measures to improve their language especially for students who are from medium other than English. For eg, right way of using dictionaries, telling the meaning of specific medical terms in the suggested text books by reading the paragraph aloud with explanation. For the slow learners who are residing in the hostel, a group of students from the same or senior batch (who are good in language, communication skills and interested in teaching, guiding) were appointed and each one will take care of a single slow learner personally.
5. Evening classes are then conducted for the slow performers by the department staff every Tuesday and Thursday between 4.15 to 5.15 pm. The topics were informed a week ahead and the students were supposed to read the topic at least once before attending the evening class.

MADURAI - 625009

The concerned teacher discusses the subject content with the head of the department before going to the class. It was ensured by the head of the department that in the evening class the students were taught the facts and concepts in an interesting way, in simple language within stipulated time, highlighting the important points & emphasizing its clinical relevance. It was a sort of group discussion and not a routine lecture. The students were instructed to keep their text books open in the class and note down the salient points. Each student was given individual attention by either asking questions in between/by asking them to come and draw the relevant pictures in the white board/by asking them to write flow chart in the board/or by asking them to teach the same topic to the other students. They were encouraged to ask more questions. The students were also taught how that particular topic should be presented in the paper on time colorfully & legibly. At the end of the class, a 5-minute test will be conducted and the papers will be corrected immediately and the feedback given.

6. The students were also given assignments on important topics and this has to be corrected and discussed by the concerned tutorial staff.
7. The slow performers were also encouraged to present student seminars. It is mandatory that all students are given equal chances.
8. They were also encouraged to participate in role play activities on clinical topics to create interest in the subject.
9. If the students show improvement in the subsequent II class test or IA, then they will be stopped from the evening classes but their progress will be continuously monitored and will always be under the guidance of their tutorial teachers.

Dept. Name Physiology

Circular

Date: 16/12/2019

Dear Students/staff members,

This is informed that a Remedial class will be conducted for 1 year M.B.B.S. (2019-2020)-
batch students on every Tuesday and Thursday from 17-12-2019 to 30-01-2020.

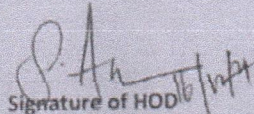

Faculty incharge: Dr.S.Anu, Prof and HOD, Dept of Physiology.

Timings:04.00 to 05.00 PM

Venue:Demo hall, Dept of Physiology

Topic:Respiratory system

Duration:One hour every Tuesday and Thursday

Remedial Classes Report

Name of the Faculty: Dr. S.Anu, Prof and HOD, Dept of Physiology.

Name of the subject: Physiology

Date: 16/12/2019

Venue: Demo Hall, Dept of Physiology

Class: Respiratory system

Timing: 04.00 to 05.00 pm

Duration: One hour every Tuesday and Thursday

Students Attended:

Special programmes for advanced learners:

1. More concentration should be given to these students during the tutorial hours by the concerned tutorial staff. Tips were given by the concerned tutorial staff regarding

- A. The importance of reading other standard physiological text books apart from the suggested ones
- B. Solving problem-based questions
- C. Improving their paper presentation skills
- D. Use of e-sources for updating their knowledge
- E. Interpreting clinical case scenarios

Prof. T. THIRUNAVUKARASU, M.D., D.A.,

HOSPITAL AND RESEARCH INSTITUTE
MADURAI - 625009

2. They were encouraged to prepare MCQ's from a particular topic so as to improve the depth in the subject
3. Training was given to these students to participate in state level quiz competitions by coordinating with other clinical departments. They were sent to medicine, surgery, radiology, nephrology, gastroenterology, pathology, pharmacology etc. to be taught by experienced professors.
4. They were also encouraged to present papers in conferences.
5. Special prizes were awarded as token of appreciation in the second year if they get honors or distinctions in the first-year university examination.

Details of special programmes for slow learners and student participation details and outcome records

For the slow performers:

1. They undergo one on one counselling with their concerned tutorial staff (the whole class of 150 students were divided into 6-7 tutorial groups) to identify their learning problem.
2. The tutorial teacher will find out whether the student.
 - a. Lacks initiative (due to personal/social issues)
 - b. has problems with accommodating to new environment (college, hostel, friends)
 - c. has language problems.
 - c. has difficulty in communication.

Prof. T. THIRUNAVUKKARASU, M.D.,D.A.,
Dean
Velammal Medical College Hospital
and Research Institute
"Velammal Village"
Madurai-Tuticorin Ring Road
Anuppanadi, Madurai-625 000, T.N.

VELAMMAL MEDICAL COLLEGE
HOSPITAL AND RESEARCH INSTITUTE
MADURAI - 625009

- d. was not able to follow the lecture class
 - e. finds the subject too volatile & uninteresting
 - f. cannot understand the facts and concepts.
 - g. does not know to give weightage to important points but memorizes everything.
 - h. does not know to present test paper properly in an organized way (though able to understand well)
 - h. not able to complete the test on time etc.
3. For the students who lack initiative/ having adjustment problems personal counselling was given by the tutorial staff and necessary steps taken either by communicating with his/her parents, friends or the warden. If required, psychologist's opinion is also sought.
4. All the students were instructed to meet the concerned tutorial teacher after the class hour in the evening at least thrice a week.
5. For the students who have language/ communication problems, the tutorial teacher suggests measures to improve their language especially for students who are from medium other than English. For eg, right way of using dictionaries, telling the meaning of specific medical terms in the suggested text books by reading the paragraph aloud with explanation. For the slow learners who are residing in the hostel, a group of students from the same or senior batch (who are good in language, communication skills and interested in teaching, guiding) were appointed and each one will take care of a single slow learner personally.
6. Evening classes are then conducted for the slow performers by the department staff every Tuesday and Thursday between 4.15 to 5.15 pm. The topics were informed a week ahead and the students were supposed to read the topic at least once before attending the evening class.

The concerned teacher discusses the subject content with the head of the department before going to the class. It was ensured by the head of the department that in the evening class the students were taught the facts and concepts in an interesting way, in simple language within stipulated time, highlighting the important points & emphasizing its clinical relevance. It was a sort of group discussion and not a routine lecture.

**VELAMMAL MEDICAL COLLEGE
HOSPITAL AND RESEARCH INSTITUTE
MADURAI - 625009**

The students were instructed to keep their text books open in the class and note down the salient points. Each student was given individual attention by either asking questions in between/by asking them to come and draw the relevant pictures in the white board/by asking them to write flow chart in the board/or by asking them to teach the same topic to the other students. They were encouraged to ask more questions. The students were also taught how that particular topic should be presented in the paper on time colorfully & legibly.

At the end of the class, a 5-minute test will be conducted and the papers will be corrected immediately and the feedback given.

7. The students were also given assignments on important topics and this has to be corrected and discussed by the concerned tutorial staff.
8. The slow performers were also encouraged to present student seminars. It is mandatory that all students are given equal chances.
9. They were also encouraged to participate in role play activities on clinical topics to create interest in the subject.
10. If the students show improvement in the subsequent IV class test or IA, then they will be stopped from the evening classes but their progress will be continuously monitored and will always be under the guidance of their tutorial teachers.

Circular

Date: 22/03/2021

Dear Students/staff members,

This is informed that a Remedial class will be conducted for I year M.B.B.S. (2020-2021) batch students on every Tuesday and Thursday from 23-03-2021 to 15-04-2021.

Faculty incharge: Dr.S.Anu, Prof and HOD, Dept of Physiology.

Timings:04.00 to 05.00 PM

Venue:Online Zoom classes

Topic:Endocrine and reproductive systems

Duration:One hour every Tuesday and Thursday

Special Programmes for Advanced Learners:

1. More concentration should be given to these students during the tutorial hours by the concerned tutorial staff. Tips were given by the concerned tutorial staff regarding
 - a. The importance of reading other standard physiological text books apart from the suggested ones
 - b. Solving problem-based questions
 - c. Improving their paper presentation skills
 - d. Use of e-sources for updating their knowledge
 - e. Interpreting clinical case scenarios
2. They were encouraged to prepare MCQ's from a particular topic so as to improve the depth in the subject
3. Training was given to these students to participate in state level quiz competitions by coordinating with other clinical departments. They were sent to medicine, surgery, radiology, nephrology, gastroenterology, pathology, pharmacology etc. to be taught by experienced professors.
4. They were also encouraged to present papers in conferences.
5. Special prizes were awarded as token of appreciation in the second year if they get honors or distinctions in the first-year university examination.

Details Of Special Programmes For Slow Learners And Student Participation Details And Outcome Records

For the slow performers:

They undergo one on one counselling with their concerned tutorial staff (the whole class of 150 students were divided into 6-7 tutorial groups) to identify their learning problem

The tutorial teacher will find out whether the student

- Lacks initiative (due to personal/social issues)
 - Has problems with accommodating to new environment (college, hostel, friends)
 - Has language problems?
 - Has difficulty in communication was not able to follow the lecture class e
 - Finds the subject too volatile & uninteresting.
 - Cannot understand the facts and concepts.
 - Does not know to give weightage to important points but memorizes everything.
 - Does not know to present test paper properly in an organized way (though able to understand well)
 - Not able to complete the test on time etc.
1. For the students who lack initiative/ having adjustment problems personal counselling was given by the tutorial staff and necessary steps taken either by communicating with his/her parents, friends or the warden. If required, psychologist's opinion is also sought.
 2. All the students were instructed to meet the concerned tutorial teacher after the class hour in the evening at least thrice a week.
 3. For the students who have language/ communication problems, the tutorial teacher suggests measures to improve their language especially for students who are from medium other than English. For eg, right way of using dictionaries, telling the meaning of specific medical terms in the suggested text books by reading the paragraph aloud with explanation.

VELAMMAL MEDICAL COLLEGE HOSPITAL AND RESEARCH INSTITUTE MADURAI - 625009

For the slow learners who are residing in the hostel, a group of students from the same or senior batch (who are good in language, communication skills and interested in teaching, guiding) were appointed and each one will take care of a single slow learner personally.

4. Evening classes are then conducted for the slow performers by the department staff every Tuesday and Thursday between 4.15 to 5.15 pm. The topics were informed a week ahead and the students were supposed to read the topic at least once before attending the evening class.

The concerned teacher discusses the subject content with the head of the department before going to the class. It was ensured by the head of the department that in the evening class the students were taught the facts and concepts in an interesting way, in simple language within stipulated time, highlighting the important points & emphasizing its clinical relevance. It was a sort of group discussion and not a routine lecture. The students were instructed to keep their text books open in the class and note down the salient points. Each student was given individual attention by either asking questions in between/by asking them to come and draw the relevant pictures in the white board/by asking them to write flow chart in the board/or by asking them to teach the same topic to the other students. They were encouraged to ask more questions. The students were also taught how that particular topic should be presented in the paper on time colorfully & legibly. At the end of the class, a 5-minute test will be conducted and the papers will be corrected immediately and the feedback given.

5. The students were also given assignments on important topics and this has to be corrected and discussed by the concerned tutorial staff.
6. The slow performers were also encouraged to present student seminars. It is mandatory that all students are given equal chances.
7. They were also encouraged to participate in role play activities on clinical topics to create interest in the subject.

Dept. Name Physiology

Circular

Date: 16/05/2022

Dear Students/staff members,

This is informed that a Remedial class will be conducted for 1 year M.B.B.S. (2021-2022) batch students on every Tuesday and Thursday from 16-05-2022 to 28-07-2022.

Faculty incharge: Dr.S.Anu, Prof and HOD, Dept of Physiology.

Timings: 04.00 to 05.00 PM

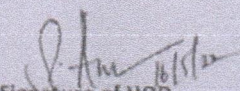

Venue: Demo hall, Dept of Physiology

Topic: GIT and reproductive system

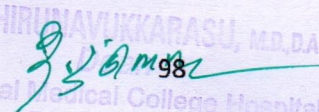

Duration: One hour every Tuesday and Thursday

29.	141	Thanikkesan P	-	73
30.	142	Thanushri V S	-	72

Special Programmes for Advanced Learners:

1. More concentration should be given to these students during the tutorial hours by the concerned tutorial staff. Tips were given by the concerned tutorial staff regarding

a. The importance of reading other standard physiological text books apart from the suggested ones

B. Solving problem-based questions

C. Improving their paper presentation skills

D. Use of e-sources for updating their knowledge

E. Interpreting clinical case scenarios

2. They were encouraged to prepare MCQ's from a particular topic so as to improve the depth in the subject

3. Training was given to these students to participate in state level quiz competitions by coordinating with other clinical departments. They were sent to medicine, surgery, radiology, nephrology, gastroenterology, pathology, pharmacology etc. to be taught by experienced professors.

4. They were also encouraged to present papers in conferences.

5. Special prizes were awarded as token of appreciation in the second year if they get honors or distinctions in the first-year university examination.
