Family Health Survey

Community Visit Report

Type Of Visit	: Family Health Survey
Academic Year	: 2021-22
Date Of The Visit	: 03.09.2021
Venue	: Kallorani
Class/Year	: 2019-20
No. of Participants	: 38
Faculty	: Dr. Sudharsan

On 3rd of September 2021, 38 Students of Batch 2019 - 20 visited Kallorani to conduct a family health survey under the department of Community Medicine, Velammal Medical College Hospital & Research Institute, accompanied by Dr. Sudharsan.

The survey was conducted to help the students to

- Study socioeconomic, psychological and environmental factors influencing health and disease in a family.
- Understand influence of family on patient's illness.
- Study the impact of illness and other physiological conditions upon the patient and family.
- Study health problems and health needs.
- Study various cultural practices.
- Observe physical and emotional development of children.
- Develop effective communication skills for health education and counseling.

The survey was conducted by the medical students in pairs or groups. The students interviewed the households of the area on a door-to-door basis and questioning for the interview was guided by a detailed pre-made questionnaire.

Family Health Survey

Community/Field Visit Report

Type Of Survey	: Family Health Survey
Academic Year	: 2021-22
Date Of The Visit	: 04.09.2021
Venue	: Kallurani
Class/Year	: 2019-20
No.Of Participants	: 38
Faculty	: Dr. Sudharsan

On 4th September 2021, 38 students of 2019-20 batch, from the department of community medicine did a family health survey in Kallurani village.

The purpose of the health survey is:-

- To gather accurate, reliable and standardized information about health of the individual.
- To gather information about the affectivity and efficiency of health program
- To obtain new information about disease/health problem

The data collected are family profile and composition, pedigree chart of the family, vital events in the past 1 year, medical social condition, size of the house, ventilation, lighting, water supply, financial status, socio-economic status assessment and their monthly expenditure pattern. The survey also records the data on things such as bathing and latrine place, housing, drainage type and solid waste management.

The medical survey is taken and the following queries are asked on things such as

- Physical health, substance use, family relationship, Immunization schedules, medical care and its schemes.
- History of past illness and present illness (if any) and treatment.
- Antenatal care and post-natal care(if present), child care and its health
- Assessment to nearby PHC or Urban health centre.
- Utilizing the medical resources properly

Diet Survey

Community Visit Report

Type Of Survey	: Diet Survey
Academic Year	: 2021 -22
Date Of The Visit	: 07.09.2021
Venue	: Kallurani
Class/Year	: 2019-2020
No.Of Participants	: 37
Faculty	: Dr. Sriandaal

On 7th of September, 37 students of posted batch 2019-20 visited Kallurani to conduct a diet survey under the department of Community Medicine, Velammal Medical College Hospital.

The survey was conducted to help the students to

- Understand the epidemiological impact of nutrition in a population.
- Understand the nutritional patterns & habits of the population.
- Understand the common health problems.
- Assess whether each individual of the family is consuming recommended level of calories, protein and fat.
- Identify the nutritional deficiencies in that population.
- Analyze the food related hygiene practices of the population.
- Understand the presence of food borne diseases in the region.

The survey was conducted by the medical students in pairs or groups. The students interviewed the households of the area on a door-to-door basis and questioning for the interview was guided by a detailed pre-made questionnaire. As the survey was conducted still during the time of the COVID-19 Pandemic all precautionary measures were observed and followed.

Diet Survey

Community Visit Report

Type of Survey	: Diet Survey
Academic Year	: 2021-22
Date Of The Visit	: 11.10.2021
Venue	: Sembakulam, K.Pudur
Class/Year	: 2019-2020
No.Of Participants	: 26
Faculty	: Dr. Sudharsan

On 11th of October 2021, 26 students of posted batch 2019 -20 visited to conduct a diet survey under the department of Community Medicine, Velammal Medical College Hospital Research Institute accompanied by Dr. Sudharsan.

The survey was conducted to help the students to:-

- understand the epidemiological impact of nutrition in a population.
- understand the nutritional patterns & habits of the population.
- understand the common health problems.
- assess whether each individual of the family is consuming recommended level of calories, protein and fat.
- identify the nutritional deficiencies in that population.
- analyze the food related hygiene practices of the population.
- understand the presence of food borne diseases in the region.

The survey was conducted by the medical students in pairs or groups. The students interviewed the households of the area on a door to door basis and questioning for the interview was guided by a detailed pre-made questionnaire.

As the survey was conducted still during the time of the COVID-19 Pandemic all precautionary measures were observed and followed.

Diet Survey

Community Visit Report

Type of Survey	: Diet Survey
Academic Year	: 2021-22
Date Of The Visit	: 12.10.21
Venue	: K Pudur
Class/Year	: 2019-20
No. of Participants	: 33
Faculty	: Dr. Sudharsan

On 12^h of October 2021, 33 Students of 2019-20 batch, made a visit to K Pudur from the department of community medicine to perform diet survey. The survey was conducted by the medical students in pairs or groups. The students interviewed the households of the area on a door to door basis and questioning for the interview was guided by a detailed pre-made questionnaire. As the survey was conducted still during the time of the COVID-19 Pandemic all precautionary measures were observed and followed.

The survey was conducted to help the students to:-

- understand the epidemiological impact of nutrition in a population.
- understand the nutritional patterns & habits of the population.
- understand the common health problems.
- assess whether each individual of the family is consuming recommended level of calories, protein and fat.
- identify the nutritional deficiencies in that population.
- analyze the food related hygiene practices of the population.

Diet Survey

Community Visit Report

Type of Survey	: Diet Survey
Academic Year	: 2021-22
Date of The Visit	: 13.10.2021
Venue	: K. Pudur
Class/Year	: 2019-2020
No.Of Participants	: 37
Faculty	:Dr. Sriandaal

On 13th of October 2021, 37 students of Batch 2019-20 to conduct a diet health survey under the department of Community Medicine, Velammal Medical College Hospital & Research Institute.

The survey was conducted to help the students understand the epidemiological impact of nutrition in a population simultaneously to also understand the nutritional patterns & habits of the inhabitants of the region.

This survey aimed to highlight the nutritional patterns and food habits of the people of the region. The diet health survey also aimed to understand the common health problems that affected the surveyed region thus aiming to establish a possible understanding between the nutritional component and disease component of the population. The diet health survey also analyzed the food related hygiene practices of the population while simultaneously understanding the presence of food borne diseases in the region. The survey was conducted by the medical students in pairs or groups of three. The students interviewed the households of the area on a door to door basis and questioning for the interview was guided by a detailed pre-made questionnaire. As the survey was conducted still during the time of the COVID-19 Pandemic all precautionary measures were observed and followed.

Diet Survey

Community Visit Report

Type Of Survey	: Diet Survey
Academic Year	: 2021-22
Date Of The Visit	: 15.11.21
Venue	: Bharathi Nagar, Managiri
Class/Year	: 2018-2019
No.Of Participants	: 57
Faculty	: Dr. Sriandaal

On 15th of November 2021, 57 students of posted batch were taken to conduct a diet survey accompanied by Dr. Sriandaal. It was a door to door survey (24 hour recall method)

The survey was conducted to help the students to

- understand the nutritional patterns & habits of the population.
- understand the common health problems.
- assess whether each individual of the family is consuming recommended level of
- calories, protein and fat.
- identify the nutritional deficiencies in that population.
- analyze the food related hygiene practices of the population.
- understand the presence of food borne diseases in the region.
- Understand the epidemiological impact of nutrition in a population
- There were deficiency of micronutrients , decreased protein intake.

Venue	: Bharati Nagar, Managiri
Class/Year	: 2018-2019
No. of Participants	: 69
Faculty	: Dr. Sriandaal

On 16th November 2021, 69 students of Posted batch were taken to Bharathi nagar, Madurai to conduct a Family health survey accompanied by Dr. Sriandaal.

The purpose of the health survey is.

- to gather accurate, reliable and standardized information about health of the individual.
- To gather information about the effectivity and efficiency of health program
- To obtain new information about disease/health problem

The survey undertaken involved are family profile and composition, pedigree chart of the family, vital events in the past 1 year, medical social condition, size of the house, ventilation, lighting, water supply, financial status, socio-economic status assessment and their monthly expenditure pattern. The survey also records the data on things such as bathing and latrine place, housing, drainage type and solid waste management.

The medical survey is taken and the following queries are asked on things such as

- Physical health, substance use, family relationship, immunization, medical schemes etc.
- History of past illness and present illness (if any) and treatment.
- Antennal care and post-natal care (if present), child care and its health
- Assessment to nearby PHC or Urban health centre.
- Utilizing the medical resources properly

Family Health Survey

Community Visit Report

Type of Survey	: Family Health Survey
Academic Year	: 2021-22
Date of The Visit	: 08.11.2021
Venue	: Ladanenthal, Madurai
Class/Year	: 2019-2020
No. of Participants	: 30
Faculty	: Dr. Sudharsan

On 8th of November 2021, 30 students of posted batch 2019-20 ,to conduct a family health survey under the department of Community Medicine, Velammal Medical College Hospital & Research Institute .

The survey was conducted to help the students to

- Understand influence of family on patients' illness.
- Study the impact of illness and other physiological conditions upon the patient and family.
- Study various cultural practices.
- Observe physical and emotional development of children.
- Develop effective communication skills for health education and counselling.
- Study health problems and health needs

The survey was conducted by the medical students in pairs or groups. The students interviewed the households of the area on a door to door basis and questioning for the

interview was guided by a detailed pre-made questionnaire. As the survey was conducted still during the time of the COVID-19 Pandemic all precautionary measures were observed and followed.

Diet Survey

Community Visit Report

Type of Survey	: Diet Survey
Academic Year	: 2021-22
Date of The Visit	: 11.11.2021
Venue	: Veppadappu, Melur
Class/Year	: 2019-2020
No. of Participants	: 31
Faculty	: Dr. Sriandaal

On 11th of November 2021, 31 students of posted batch were taken to conduct a Diet survey accompanied by Dr. Sriandaal.

This survey aimed to highlight the nutritional patterns and food habits of the people of the region. The diet health survey also aimed to understand the common health problems that affected the surveyed region thus aiming to establish a possible understanding between the nutritional component and disease component of the population.

The diet health survey also analyzed the food related hygiene practices of the population while simultaneously understanding the presence of food borne diseases in the region.

The survey was conducted based on a pre-formed questionnaire. We had to go door to door to conduct this survey. All COVID precautionary measures were taken. During this survey we understood the nutritional deficiencies faced by the children. Decreased protein intake is the common issues faced by them.

Diet Survey

Community Visit Report

Type of Survey	: Diet Survey
Academic Year	: 2021-22
Date of The Visit	: 12.11.21
Venue	: Veppadappu, Melur
Class/Year	: 2019-2020
No. of Participants	: 35
Faculty	: Dr. Sriandaal

On 12th November 2021, 35 students of Posted batch were taken to conduct a diet survey, accompanied by Dr. Sriandaal.

The survey was conducted to help the students understand the epidemiological impact of nutrition in a population simultaneously to also understand the nutritional patterns & habits of the inhabitants of the region.

It is a 24 hour recall method; this survey was conducted by a pre-prepared questionnaire. The survey was conducted to help the students understand the epidemiological impact of nutrition in a population simultaneously to also understand the nutritional patterns & habits of the inhabitants of the region.

Dietary surveys help determine which population subgroups as defined by age, sex, race, ethnicity, income, urbanization, or education are at risk for energy and nutrient deficiencies.

Diet Survey

Community Visit Report

Type Of Visit	: Diet Survey
Academic Year	: 2021-22
Date Of The Visit	: 2.12.21
Venue	: Kulamangalam
Class	: 2018-19
No. of Participants	: 71
Faculty	: Dr. Sudhir Ben, Dr Mareeswaran

On 2nd of December, 71 students of posted batch have been taken to conduct a Diet survey to Kulamangalam accompanied by Dr. Sudhir Ben & Dr. Mareeswaran.

The purposes of Diet surveys are:

- to identify, predict and detect chronic or acute food and nutritional problems.
- to target population groups for both short-term relief efforts and longer-term policy and programme development.
- to plan and implement food and nutritional programmes and interventions.
- to monitor changes and evaluate the impact of interventions and programmes.

Information from Diet survey :-

- Socio-economic and demographic variables classified according to sex, race, age, ethnicity and geographical location.
- percentage of adequacy for energy and nutrients compared with the recommended dietary goals.
- per capita consumption of basic food groups.
- variations in per capita consumption within the population.
- mean consumption and distribution of energy, proteins, fats, carbohydrates, vitamins and minerals.
- percentage contribution of foods or food groups to energy from proteins, fats, carbohydrates and other nutrients of interest.

Family Health Survey

Community Visit Report

Type of Visit	: Family Health Survey
Academic Year	: 2021-22
Date of The Visit	: 3.12.21
Venue	: Subramaniapuram
Class/Year	: 2019-20
No. of Participants	: 32
Faculty	: Dr. Sudharsan

On 3rd of December 2021, 32 students of batch 2019-20 were taken to conduct a family health survey accompanied by Dr. Sudharsan.

What we learnt:-

Family health is a state in which the family is a resource for the day-to-day living and health of its members. A family provides its individual members with key resources for healthful living, including food, clothing, shelter, a sense of self-worth, and access to medical care.

The survey helped the students to :-

- Understand influence of family on patients illness.
- Study the impact of illness and other physiological conditions upon the patient and family.
- Study various cultural practices.
- Observe physical and emotional development of children.
- Develop effective communication skills for health education and counselling.
- Study health problems and health needs

Family Health Survey

Community Visit Report

Type of Survey : Family Health Survey
Academic Year : 2021-22
Date of The Visit : 04.12.21
Venue : Subramaniapuram
Class/Year : 2019-20
No. of Participants : 35
Faculty : Dr. Sriandaal

On 4th December 2021, 35 students of batch 2019-20 were taken to conduct a Family health survey accompanied by Dr. Sriandaal.

The survey was conducted by the medical students in pairs or groups of three. The students interviewed the households of the area on a door to door basis and questioning for the interview was guided by a detailed pre-made questionnaire.

The questionnaire includes on the lighting of the house, surrounding ,waste disposal, sewage, latrines, kitchen, no. of rooms, no. of members in the family, social interaction, schooling, studies, family income.

Based on the questionnaire we classified the family mostly on family income. The survey helped us to understand the daily challenges faced by the Family.

Diet Survey

Community Visit Report

Type of Visit	: Diet Survey
Academic Year	: 2021-22
Date of The Visit	: 07.12.2021
Venue	: Chinna Anuppanadi
Class/Year	: 2019-2020
No. of Participants	: 31
Faculty	: Dr. Sriandaal

On 7th of December 2021, 31 students of batch 2019-20 were taken to conduct a family health survey accompanied by Dr. Sriandaal.

Data on food and nutrient intake from individuals are collected using a variety of methods. They are:

- 24-hour recalls.
- food records.
- diet history.
- food frequency questionnaires.

Nutritional status is influenced by a number of factors, such as age, sex, socio-economic status, culture, household food security, dietary patterns, environmental sanitation etc. Many of these factors have been studied in relation to energy-protein malnutrition.

This survey aimed to highlight the nutritional patterns and food habits of the people of the region. The diet health survey also aimed to understand the common health problems that affected the surveyed region thus aiming to establish a possible understanding between the nutritional component and disease component of the population.

Diet Survey

Community Visit Report

Type of Visit	: Diet Survey
Academic Year	: 2021-22
Date of The Visit	: 08.12.2021
Venue	: Pykara
Class	: 2019-2020
No. of Participants	: 30
Faculty	: Dr. Sriandaal

On 8th of December 2021, 30 students of Batch 2019-20 were taken to conduct a Diet survey accompanied by Dr. Sriandaal.

The survey was conducted to help the students understand the epidemiological impact of

nutrition in a population simultaneously to also understand the nutritional patterns & habits of the inhabitants of the region.

The survey was aimed at highlighting the prevailing nutritional pattern in the community and common food habits followed in the area. It also aimed at understanding the health problems which helped to understand the relationship between the prevalent disease component and the nutritional component.

It helped the students to understand the impact of nutrition on a population and also helped in analysing food related hygiene practices, possible contributing factors to deficiencies, sources of food borne diseases and their impact on families living in the particular area.

Family Health Survey

Community Visit Report

Type of Survey : Family Health Survey
Academic Year : 2021-22
Date of The Visit : 15.12.21
Venue : Ladanenthal
Class/Year : 2019-2020
No. of Participants : 27
Faculty : Dr. Sudharsan

On 15th of December 2021, 29 students of Batch 2019-20, were taken to conduct a Family health survey accompanied by Dr. Sudharsan.

The survey helped us to :-

- Understand influence of family on patients illness.
- Study the impact of illness and other physiological conditions upon the patient and family.
- Study various cultural practices.
- Observe physical and emotional development of children.
- Develop effective communication skills for health education and counselling.
- Study health problems and health needs

It was a door-to-door survey and the survey was taken based on a pre-prepared questionnaire.

Diet Survey

Community Visit Report

Name Of The Industry : Diet Survey
Academic Year : 2020
Date Of The Visit : 27.12.2021
Venue : Ladanenthal
Class/Year : 2019-2020
No. of Participants : 30
Faculty : Dr. Sudharsan

On 27th of December 2021, 30 students of Batch 2019-20 were taken to conduct a Diet survey accompanied by Dr. Sudharsan.

The survey was conducted to help the students understand the epidemiological impact of nutrition in a population simultaneously to also understand the nutritional patterns & habits of the inhabitants of the region.

The survey was aimed at highlighting the prevailing nutritional pattern in the community and common food habits followed in the area. It also aimed at understanding the health problems which helped to understand the relationship between the prevalent disease component and the nutritional component.

It helped the students to understand the impact of nutrition on a population and also helped in analysing food related hygiene practices, possible contributing factors to deficiencies, sources of food borne diseases and their impact on families living in the particular area.

Type Of Visit	: Family Health Survey
Academic Year	: 2021-22
Date Of The Visit	: 05-05-2022
Venue	: Silaiman
Class/Year	: 2020-21
No.Of Participants	: 18
Faculty	: Dr. Vasumathi

On 5th May 2022, 18 Students of Batch 2020-21 visited Puliyankulam village to conduct a family health survey under the department of Community Medicine, Velammal Medical College Hospital & Research Institute.

The survey was conducted to help the students to

- Understand influence of family on patients' illness.
- Study the impact of illness and other physiological conditions upon the patient and family.
- Study various cultural practices.
- Observe physical and emotional development of children.
- Develop effective communication skills for health education and counselling.
- Study health problems and health needs

The survey was conducted by the medical students in pairs or groups. The students interviewed the households of the area on a door to door basis and questioning for the interview was guided by a detailed pre-made questionnaire. During the survey all precautionary measures were observed and followed.

Type of Visit	: Diet Survey
Academic Year	: 2021-22
Date of The Visit	: 06.05.2022
Venue	: Puliyankulam
Class/Year	: 2020-2021
No.Of Participants	: 20
Faculty	: Dr. Sudharsan

On 6th of May 2022, 20 students of 2020-21 batch were taken to conduct a diet survey accompanied by Dr. Sudharsan.

The survey was conducted to help the students to

- understand the nutritional patterns & habits of the population.
- understand the common health problems.
- assess whether each individual of the family is consuming recommended level of calories, protein and fat.
- identify the nutritional deficiencies in that population.
- analyse the food related hygiene practices of the population.
- understand the presence of food borne diseases in the region.
- Understand the epidemiological impact of nutrition in a population.

It was a door to door survey (24 hour recall method) & the survey revealed the presence of deficiency of micronutrients, decreased protein intake.

Diet Survey

Community Visit Report

Type of Survey	: Diet Survey
Academic Year	: 2021-22
Date of The Visit	: 07.06.2022
Venue	: Thirupuvanam
Class/Year	: 2020-2021
No. of Participants	: 25
Faculty	: Dr. Sudharsan

25 students of posted batch were taken to conduct a diet survey accompanied by Dr. Sudharsan.

The survey was conducted to help the students to

- understand the nutritional patterns & habits of the population.
- understand the common health problems.
- assess whether each individual of the family is consuming recommended level of calories, protein, fat.
- identify the nutritional deficiencies in that population.
- analyze the food related hygiene practices of the population.
- understand the presence of food borne diseases in the region.
- understand the epidemiological impact of nutrition in a population

There were deficiency of micronutrients , decreased protein intake.

It was a door to door survey (24 hour recall method).
